

## **Software Keys** (also known as “dongles”)

All of our software is copyrighted. In addition, all of our software (except for Speedy Dialer software) is licensed to each buyer with the use of a Software Key.

We use 4 types of Software Keys: 2 are for parallel (printer) ports and 2 are for USB ports on your computer. These Software Keys are programmed for the product purchased and the appropriate number of telephone lines. These Software Keys represent a license to use that particular software on one computer.

It is a Federal crime to use unlicensed or “pirated” software (intellectual property) or to “crack” the software key. Violators will be prosecuted.

Type 1 (USB port)

Type 2 (USB port)

Type 3 (parallel port)

Type 4 (parallel port)
